Birth Records 1850-1900

There are two books on file for this period; one takes birth from 1850 to 1865; the other takes births from 1850 to 1900. At some point in time, the births in the first volume were copied into the second volume and are scattered throughout. We did both volumes. In some instances, there are births for the first period in the second book which do not appear in the first. In some instances, additional information such as a maiden name has been added in the second book which does not appear in the first. Whether the copist had access to additional records or added the information from other data is unknown. Some cautions should be observed with the early births. The town clerk of the time made very peculiar 0’s. They look like 1’s. The copist copied many of these as 1; we think they are 0 but have used the copist’s material in most instances. Likewise the original 7’s and 9’s are so much alike that copist used 9 where we would use 7.

We have retained the original entries without any effort to correct obvious mistakes or to reconcile entries. For example, a place may be given as Lisbon, N.H., in one entry and the same birthplace for the same person as Lisbon, N.Y. Names, especially “foreign” names are sometimes spelled phonetically and may go back to the presently accepted spelling later on, e.g., MacIntosh and then McIntosh. Since we have compiled the gravestone inscriptions for the town, we are aware that many entries are not spelled in the same way as the family spelled them, e.g., the Bayley family name in the family records is spelled Bailey; the Timson family is spelled correctly in the first entry but then is spelled Timson.

Where not otherwise specified, the birth is given as of Plymouth and so is the residence of parents. Likewise the color of the child is white unless otherwise specified. A special index has been prepared for known maiden names of mothers.

With all possible care, we are sure we have misinterpreted some of the entries.
