Marriages 1850-1900

All taken from the second book of vital records covering the period from 1850-1900 (occasionally there is an entry for 1849); however, there is a gap in the records from about 1866 to 1876. These records were all copied from the original books, including another book which goes to about 1860, apparently by one person. No attempt has been made to correct any apparent errors, although some place names have been modernized.

A complete entry contains the following information usually in the following order. Where information is not found, that part does not appear in the record. The entries are arranged in alphabetical order by groom by year and copied as they appear in original record.
